

Going Solar: We Take Care of Everything

- **Rebate**

Solar Works files for your California Solar Initiative (CSI) rebate reservation. (4 to 8 weeks for approval.)

- **Install Site Visit**

If needed, our installation team will visit to finalize any remaining design details.

- **Permit**

Solar Works obtains a building permit. (1 to 10 days, depending on jurisdiction.)

- **Net Metering**

Solar Works files your PG&E interconnection application.

- **Schedule Installation**

With the initial building permit, Solar Works schedules your installation.

- **Installation**

Solar Works installs system (one to three days for typical roof-mounted system).

- **Final Permit**

Solar Works meets with local building inspector. After sign-off, we fax the final building permit to PG&E. Final payment is due at this time.

- **Meter Switch**

Within approximately two weeks, PG&E inspects the system and installs new bidirectional meter.

- **Owner's Manual**

Solar Works provides a complete orientation and owner's manual for your new solar electric system

- **Follow-Up**

We'll mail you a postcard annually for you to fill out so we can track your system's production.
